

Release Name: ER_LTA2013DB01

Release Date: June 26th 2014

Release Notes: This patch resolves problems with audit data not being correctly deleted from the LT Auditor+ Archive database. This issue impacts all customers on LT Auditor+ 2013 on *Microsoft SQL Server databases*.

Impact: If this emergency patch is not applied the LT Auditor+ archive database can grow uncontrollably.

Instructions to apply patch:

1. Extract the zip file and copy the SQL script file ***usysa_DeleteArchiveData.sql*** to the server hosting the LT Auditor+ databases.
2. Open this file using Microsoft SQL Management Studio.
3. Run this script on the LT Auditor+ Archive Database
